- **Database:** PostgreSQL, Flyway
- **Testing:** Cypress, JUnit
- **Tools:** Git, Gerrit, Jenkins, Jira, CI/CD, Sentry

WORK EXPERIENCE

Full-Stack Developer | SIGSCAN, Toulouse JUNE 2024 - PRESENT
Developing enterprise software for IoT-based asset tracking across web, mobile and backend platforms.

- Developed and maintained features across Angular, Spring Boot and Android applications in a production environment.
- Designed and integrated REST APIs, contributing to both frontend and backend development.
- Improved application stability by resolving runtime crashes, asynchronous issues and API integration problems, reducing production incidents.
- Delivered user-facing features including responsive interfaces, navigation improvements and configurable workflows across web and mobile applications. • Increased software quality through automated testing (Cypress, JUnit) and proactive monitoring with Sentry. • Collaborated in an Agile team using Git, Gerrit and Jira while contributing throughout the software development lifecycle.

Project assistant | Service Volontaire International, Brussels 2020

Bartender | ÔBoudupont, Toulouse 2021 - 2022

Manager | Passion Aventure (kayak rental), Marcilhac 2013 - 2019

EDUCATION

Software Developer Certification – Level 6 (Bachelor's equivalent)
L.D.N.R, Labège 2023-2024
Gained hands-on experience in front-end and back-end development by delivering team projects from design to deployment, applying best practices in project management and system architecture.

Masters Degree in International Politics
Toulon University 2018-2020
Developed strong analytical, research and geopolitical analysis skills alongside expertise in international relations, diplomacy and public policy.

Bilingual History Degree (French-English)
Jean Jaurès University, Toulouse 2013 - 2016
